

REPORT WORLD BANK

Pavia e Ansaldo ha collaborato, con il contributo di Luca Montolivo e di Elena Felici, al progetto “**Enabling the Business of Agriculture**” della World Bank, contribuendo, per la parte italiana, alla raccolta delle informazioni necessarie per la redazione del Report 2017 “Enabling the Business of Agriculture 2017, the third report in the series, offers insights into how laws and regulations affect private sector development for agribusinesses, including producer organizations and other agricultural entrepreneurs. Globally comparable data and scored indicators encourage regulations that ensure the safety and quality of agricultural inputs, goods and services but are not too costly or burdensome. The goal is to facilitate the operation of agribusinesses and allow them to thrive in a socially and environmentally responsible way, enabling them to provide essential agricultural inputs and services to farmers that could increase their productivity and profits. Regional, income-group and country-specific trends and data observations are presented for 62 countries and across 12 topics: seed, fertilizer, machinery, finance, markets, transport, water, ICT, land, livestock, environmental sustainability and gender. Data are current as of June 30, 2016”.
